

Astana IT University

AI Declaration

Pre-defense 1

Development of an AR/VR Application for Professional Training of Medical Specialists

Student: Anatoliy Tsoy

Group: SE-2419

Supervisor: Akerke Akanova

Astana, 2026

I declare that I used artificial intelligence tools, including ChatGPT and Claude, during the preparation of my Project Proposal. These tools assisted in creating the title page and table of contents, developing diagrams and schematics, improving the grammar, clarity, and academic style of the text, expanding academic literature search queries by suggesting relevant synonyms and alternative terms, and clarifying concepts and questions related to the project.

I reviewed the suggestions provided by these AI tools and take responsibility for the content, accuracy, and final version of my work.
